Work Experience

Software Developer Trainee – Sopti AI Mar 2026 - Jul 2026
Chennai, India (Full-time) *Completed*

- Developed and maintained web application features using Laravel, PHP, JavaScript, and MySQL.
- Worked on the ColdStone module by implementing real-time monitoring for temperature and weight sensors to support operational monitoring.
- Developed Python automation scripts to monitor sensor data and trigger alerts based on configurable temperature thresholds.
- Contributed to the Forecast Module by developing new features, enhancing existing functionality, and resolving reported issues.
- Investigated and fixed frontend and backend bugs, improving application performance and stability.
- Performed detailed manual testing by validating application workflows, identifying defects, reproducing issues, and verifying fixes before deployment.
- Implemented minor UI/UX enhancements, including form updates, layout improvements, and usability refinements based on user requirements.
- Wrote and optimized MySQL queries for data retrieval, updates, and database maintenance.
- Collaborated with team members using Git for version control and participated in Agile development activities.

Freelance Full Stack Developer – Smart Delivery Management System Jan 2026 - Feb 2026
(Contract) *Completed*

- Developed a delivery management platform focused on workflow automation and role-based access.
- Integrated frontend components with backend services and MySQL-based business logic.
- Reduced manual coordination effort by nearly **40%** through system-driven processes.

Software Developer – BDreamz Global Solutions Pvt Ltd Aug 2025 - Jan 2026
Web Developer (Onsite) *Completed*

- Developed React-based user interfaces and integrated them with RESTful backend services.
- Collaborated with team members to implement features following Agile development practices.
- Improved feature delivery efficiency by about **35%** using GitHub and Jira.

Projects

Employee Leave Management System | *React.js, Node.js, Express.js, MySQL*

- Designed and developed an employee leave workflow system, reducing manual approval effort by **55%**.
- Implemented authentication, validation rules, and status tracking, improving request accuracy by **40%**.
- Integrated REST APIs with a React-based interface, improving system response efficiency by **35%**.

Technical Skills

Languages: Java, JavaScript, Python, PHP
Frontend: HTML, CSS, Bootstrap, React.js, Tailwind CSS
Backend: Node.js, Express.js, Java (Spring Boot, JDBC), Laravel
Databases: MySQL, SQLite
Concepts: REST APIs, Role-Based Access, Backend Logic, Manual Testing
Tools & Platforms: Git, GitHub, Jira, Shopify, Pyright

Certifications

Java Full Stack Besant Technologies

Azure Data Fundamentals Microsoft

Google Cloud Computing Foundations NPTEL

Education

Sri Manakula Vinayagar Engineering College Madagadipet, Puducherry
B.Tech in Computer and Communication Engineering *Completed 2025*

Jawahar Higher Secondary School Neyveli, Tamil Nadu
Higher Secondary Certificate (HSC) *Completed 2021*
