rvishnuxvarthan@gmail.com | +91-8300714342 | linkedin.com/in/vishnuvarthan-r | github.com/vishuxc

Technical Skills

Languages: PHP, JavaScript, Python, Java, SQL
Frontend: React.js, Blade, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend & APIs: Node.js, Express.js, Laravel, RESTful APIs, Fast/Async IO
Databases: MySQL, SQLite
Tools & Frameworks: Git, GitHub, HTTPX, Asyncio, Postman, Jira, Webhooks

Work Experience

Software Developer Trainee Mar 2026 – Sep 2026
Sopti AI *Chennai, India*

- Engineered backend analytical routines for the Forecast Module within the ColdStone platform using Laravel, PHP, and MySQL to track seasonal demand trends.
- Built and documented RESTful API endpoints enabling bidirectional data synchronization between backend services and mobile applications.
- Executed automated and manual validation testing across workflows, resolved functional defects, and optimized database queries during bi-weekly Agile sprints.

Freelance Frontend Developer Jan 2026 – Feb 2026
Smart Delivery Management System (Contract) *Remote*

- Built responsive interfaces and resolved cross-browser UI issues across dispatch workflows.
- Integrated RESTful APIs for real-time order tracking and configured payment gateway checkout flows.

Web Development Intern Aug 2025 – Jan 2026
BDreamz Global Solutions Pvt Ltd *Bengaluru, India*

- Constructed reusable UI components with React.js and integrated them with RESTful backend endpoints.
- Collaborated in daily standups and sprint planning, using Git and GitHub for version control and Jira for bug tracking.

Key Projects

Distributed Web Health & Incident Alert Monitor | *Laravel, Python, MySQL, HTTPX, Asyncio, Webhooks*

- Architected a decoupled uptime monitoring system featuring a Laravel Blade management dashboard and an asynchronous Python background worker engine.
- Implemented concurrent HTTP diagnostics in Python using `httpx` and `asyncio` to measure latency thresholds, catch connection timeouts, and detect 4xx/5xx status codes.
- Designed internal RESTful APIs in Laravel to ingest diagnostic logs, persist historical incidents in MySQL, and dispatch real-time incident cards to Discord webhooks.

Employee Leave Management System | *React.js, Node.js, Express.js, MySQL*

- Developed a full-stack portal to automate leave application, multi-tier approvals, and leave balance tracking.
- Integrated Formik and Yup for client-side form validation rules and built secure REST APIs for status management.
- Structured relational MySQL queries and route handlers in Express.js to enhance data retrieval speed and request integrity.
